📍 Bengaluru, India (Open to Relocation)

PROFESSIONAL SUMMARY

Technical Lead with 5+ years of experience building scalable consumer-facing web platforms and high-volume data applications across GenAI, Growth, and Product domains. Strong background in full-stack development, distributed system design, API architecture, and cross-functional product execution supporting millions of users. Led architecture, development, and delivery of customer-facing and internal products while improving system performance, reliability, and operational efficiency.

TECHNICAL SKILLS

Frontend: React js, Angular, TypeScript, Tailwind CSS, Material UI, Axios, Redux, Cypress, JWT, OAuth, WCAG

Language Backend: JavaScript, TypeScript, Python, Node.js, Express.js, RESTful APIs, GraphQL, SQL

Tools: Azure blob storage, Nginx, GitHub, CI/CD Pipelines, Postman, VS code, Codex

Others: Micro-frontend, Responsive design, System Design, Cross-Functional Collaboration

WORK EXPERIENCE

Kaizen Que

March 2025 – Present

Software Development Team Lead

Bengaluru, India

- Implemented **AI-powered OCR and NLP platform** using Gemini Flash 3 model to digitize 25+ years of patient records with 95%+ extraction accuracy
- Optimized chunked file-processing pipelines for large medical documents, reducing **upload time by 70%**
- Enhanced **Hybrid-RAG retrieval** with incremental result rendering, cutting perceived latency by 65% and reducing query response time from 8 seconds to under 3 seconds
- Developed **real-time WebSocket** dashboard enabling record search during ingestion, reducing manual review effort by 60%

Tech Stack: React.js, Python, WebSocket

Full Stack Developer

- Built unified CRM integrating Google Ads, Facebook, and 100+ website landers through webhooks, generating **5,000+ organic leads** monthly
- Achieved **35% ROI** improvement through UTM tracking and webhook integration for lead attribution and ad spend optimization
- Architected asset management dashboard for 200+ in-house equipment, reducing manual management by **40%**

Tech Stack: React.js, Node.js, MySQL, Webhooks

iFIX Tech Global

March 2022 – February 2025

Associate Software Engineer

Bengaluru, India

- Configured Cypress test runs as a quality gate in the deployment pipeline, ensuring zero untested releases to staging
- Redesigned an **OpenAI LLM-based ITSM chatbot** to translate large documents in a single pipeline, optimizing context handling and improving answer relevance by 30%.
- Built **SLA analytics** module with Chart.js, optimizing large dataset filtering and real-time timezone-aware updates, reducing refresh time by 20%
- Re-architected bulk ticket assignment with batch payload processing, reducing request size by 75%
- Developed **role-based** government case management portal for citizens and authorities, streamlining 10,000+ annual filings and reducing status inquiries by 40%

Tech Stack: Angular, Material UI, Slickgrid

EVERYWHERE

Full Stack Developer - Internship

November 2020 – June 2021

Bengaluru, India

- Resolved LMS workflow timer issues through improved state management and synchronization, ensuring accurate time tracking across transitions
- Reduced bundle size and improved **Core Web Vitals** scores through lazy loading, code splitting, image compression, and memoization by cutting page load time by 70%
- Converted Figma prototypes into fully responsive React.js website, delivering project independently

Tech Stack: React.js, Bootstrap

ACHIEVEMENTS & CERTIFICATIONS

Consistent Performer Award – Recognized for ownership, execution excellence, and cross-functional delivery

Global Hackathon Participant – Devpost YouCam AI Challenge (Skin Analysis + Virtual Try-On Solution)

Product Management Certificate – Product strategy, roadmaps, prioritization frameworks, PRDs, stakeholder management

MERN Stack Development – PrepBytes 6-month bootcamp, 6 capstone projects

Microsoft Technology Associate – Security Fundamentals (2018)

Machine Learning and Data Science – Nelumbus Technologies

PROJECTS

- **Virtual Clothes Try-On AI:** AI-driven virtual try-on experience overlaying garments onto user images for realistic outfit visualization.
Tech Stack: React.js, Python, YouCam APIs, Gemini LLM
- **AI Job Automation:** Centralized job tracking platform aggregating listings from multiple sources with AI-powered matching, cover letter generation, and compatibility scoring.
Tech Stack: React.js, Python, Apify, Perplexity, Playwright
- **Markdown Production Application:** Privacy-focused browser-based Markdown viewer with GFM rendering without document uploads or exposure.
Tech Stack: Next.js, Tailwind CSS
- **Procurement Dashboard:** Integrated analytics dashboard processing uploaded data to visualize KPIs across quarterly, monthly, and yearly periods.
Tech Stack: Next.js, Chart.js

EDUCATION

BTL Institute of Management and Engineering (VTU Board)

Bachelor of Engineering – Computer Science and Engineering, GPA: 7.2/10

September 2017 – September 2021

Bengaluru, India
